

AMINE DAHMANE

📍 Montréal, QC 📞 438-229-0975 ✉ aminatedahmanepro@gmail.com

🌐 [linkedin.com/in/dahmane](https://www.linkedin.com/in/dahmane) 🐙 github.com/dhmprog

Professional Summary

Passionate about full-stack development, systems programming and interactive technologies. Experienced in designing production-grade web platforms with modern technologies (Next.js, React, Supabase). Strong foundation in object-oriented programming, data structures and agile methodologies. Fast learner, analytical mindset and excellent team player.

Education

B.Eng. in Software Engineering — *École de technologie supérieure (ÉTS), Montréal* 2025 – Present
‣ *Cheminement universitaire en technologie (university preparatory year)* 2025

DEC (Diploma of College Studies) – Natural Science — *Collège Ahuntsic, Montréal* 2024

Personal Project

MTL Héros du Terrain — Community Sports Platform 2026 – Present

🐾 mtlherosduterrain.org | 📱 App Store

- Design and develop a **full-stack web platform** (deployed in production at mtlherosduterrain.org) to manage weekly soccer games, tournaments, teams and real-time attendance for a Montreal sports community
- Build the platform with **Next.js 16**, **React 19**, **TypeScript** (strict mode), **Tailwind CSS v4** and **Supabase** (PostgreSQL, Auth, Realtime, Edge Functions)
- Implement **row-level security (RLS)** on all tables, role-based route protection and Server Actions for secure authentication
- Develop a **real-time spot counter** with automatic waitlist management and a **reliability score** system based on attendance patterns
- Create a **role-based system** (player, captain, referee, administrator) with team management, invite codes and live tournament brackets
- Structure the codebase as a **monorepo** (npm workspaces), automate quality checks in CI with **Vitest** and **Playwright** (E2E) and deploy on **Vercel**
- Design and develop the **native mobile app** with **Expo (React Native)** and push notifications, published on the App Store

Academic Projects

Abdian — Flight Booking Web and Mobile Application Winter 2025

🐙 github.com/DHMPROG/TCH099-Abdian | Final project of the Cheminement universitaire (TCH099)

- Design and develop, in a team of 4, a **flight booking application**: round-trip search, seat selection, passenger form, sign-up and login
- Develop the **PHP 8 backend** following an **MVC architecture** (controllers, controller factory, **DAO** layer) with a **MySQL** database and PDO prepared statements
- Design a **REST API** (users, flights) consumed by both the website and the mobile app
- Integrate the **frontend** pages in HTML, CSS and JavaScript
- Containerize the environment with **Docker Compose** (PHP, MySQL, phpMyAdmin) and automate deployment to **Azure App Service** with **GitHub Actions** (CI/CD)
- Contribute to the **Android mobile app** in **Java** (MVVM architecture, LiveData, RecyclerView, OkHttp)

Professional Experience

Audiovisual Director / Event Coordinator — MTL Héros du Terrain2024 – Present

- Develop automation scripts with **Adobe ExtendScript**
- Manage **domain names** and maintain the **website** and **mobile app**
- Create professional content with **Adobe After Effects**, **Premiere Pro** and **Photoshop**
- Coordinate and communicate with **potential partners**
- Organize youth sports events from start to finish
- Handle on-site logistics during tournaments and help manage teams

Work Experience

Guest Services Agent — Quartier des Spectacles Partnership2025 – Present

- Welcome and inform visitors during large-scale cultural events
- Collaborate with technical and logistics teams to ensure events run smoothly

Technology Department Associate — Walmart Canada2021 – 2022

- Advise customers on technology products, analyze their needs and recommend suitable solutions

Team Leader — McDonald’s Canada2020 – 2021

- Supervise a team in a fast-paced environment; train and onboard new employees

Technical Skills

Core Skills	Backend programming, frontend web programming, mobile development, REST API design, relational databases (SQL), software architecture (MVC, MVVM), object-oriented programming, automated testing, continuous integration and deployment (CI/CD), containerization, agile methodologies
Languages	C, C++, Java, Python, JavaScript, TypeScript, PHP, SQL
Frontend	React 19, Next.js 16 (App Router), Tailwind CSS, HTML, CSS
Backend / BaaS	Supabase (PostgreSQL, Auth, Realtime, Edge Functions, RLS), PHP 8 (MVC, PDO), MySQL
Mobile	Expo (React Native), Android (Java, MVVM), Android Studio, Flutter
Testing	JUnit 5 (Java), Vitest (JS/TS), Playwright (E2E)
Build Tools	Gradle, Maven, npm workspaces
Tools	Git, GitHub, VS Code, IntelliJ IDEA, Jira
Game Engines	Unreal Engine, Unity (basics)
Multimedia	Photoshop, Premiere Pro, After Effects, Adobe ExtendScript
Operating Systems	Windows, Linux, macOS

Languages

French (fluent) • English (fluent) • Arabic (native)
